PE Exam

Young Member Event

Play Ball!

Tuesday, June 27, 2006

Sponsored by MACTEC

The Tulsa SAME Post will host its annual Young Member event Tuesday, June 27th at the Tulsa Drillers Stadium, 6:00 p.m. Everyone's invited - you don't have to be a young member to attend. We will have hotdogs and short program at 6:00 p.m. and the game starts at 7:00 p.m.

All new Young Members attending will receive a complimentary one-year membership to SAME. So, if you are 36-years-old or younger and have been thinking of joining SAME, this is a great time to meet existing members and receive a free membership for one year.

Located in the heart of Tulsa at EXPO Square, 15th & Yale. Drillers Stadium is easily accessible from any of the city's major expressways. The stadium is 3 miles north of the Yale exit of Interstate 44 and 1 1/2 miles south of the Yale exit of Interstate 244.

Please RSVP by June 23 to Shannon Hudson at SDHUDSON@mactec.com

marketing and networking, let us know.**

**The conference is free, but call or
fax your company name, and the
names of people attending by
COB 6 July 2006.**

Fax number is: 918-669-7495.

Since its beginning in 1946, MACTEC has evolved into a leading engineering and design, environmental, and construction services firm that emphasizes technical excellence with personal service from a local office. Through strategic acquisitions in the past several years, the company has grown to 3,000 employees and 100 offices in over 30 states. Revenues place MACTEC at 29th among Engineering News-Record's Top 500 Design Firms and at 30th among the Top 200 Environmental Firms nationwide.

With specialists in over 50 engineering and scientific disciplines, MACTEC provides a full range of services to over 7,000 private and public sector clients, including local, state, and federal government agencies. **MACTEC Federal Programs**, one of our three operating units, is tailored specifically to our federal clients.

Eighty percent of our federal work is for Indefinite Delivery Indefinite Quantity contracts, which require execution of simultaneous, multiple task orders. Because of our consistent performance in adhering to schedules and budgets and in developing practical engineering solutions, federal clients continue to utilize our many services. Since 1986, we have closed 73 prime and 60 subcontract agreements for the Department of Defense.

Our experience also includes extensive design and construction work on various national security and intelligence related assets. We have provided consulting services to both federal agencies and commercial clients in response to terrorist attacks in Washington, DC, and at the World Trade Center. Also, we have provided design and construction services for such security-sensitive projects as the Air Force One complex, Presidential Communications complex, National Command and Control facilities, National Maritime Intelligence Center, and various US

Embassy upgrades.

MACTEC's professional engineers, scientists, architects, quality auditors, technicians and support staff provide consistent, cost-effective, risk-managed services to our federal clients, no matter the project scope or location. In fact, our work for federal agencies has taken us to locations all over the world, including Africa, Asia, Central America, and South America.

Through innovative solutions, current technologies, top-notch expertise, and uncompromising quality, MACTEC helps our clients achieve their goals and objectives and meet the demands of today's complex global marketplace.
